## History

### **V4.6 2013-01-03**

- Fixed issue with invoice data for products with price under 100 minor units
- Added setting for disable/enable invoice data
- Fixed issue with currency conversion on callback for multiple currencies

### **V4.5 2012-09-28**

- Minor adjustment for PrestaShop 1.5

### **V4.4 2012-09-11**

- Updated to support Svea and Klarna

### **V4.3 2012-08-06**

- Updated logo path

### **V4.2 2012-03-14**

- Updated to use the new Payment Window v2

### **V4.1.1 2012-02-09**

- Removed Cart:BOTH to ensure compatibility with older versions of PrestaShop

### **V4.1 2011-11-22**

- Replaced NuSOAP with SoapClient
- Fixed showing of card logos in right and left block

### **V4.0 Final 2011-06-30**

- Fixed logo in order administration
- Fixed MD5 calculation

### **V4.0 2011-06-28**

- Cleaned up in the module files.
- Added Decodecookie as option for relay-script.
- Can now close an uncomplete captured split payment from the admin.
- Corrected some minor textual errors in the admin.
- Corrected error with Forbrugsforeningen using integrated layout.
- Can now add card level based payment methods.
- Optimized for OPC from Canin using Prestashop 1.3.7.
- Corrected error in the currency (whiche checking out).

### **V3.9 2011-04-27**

- HTTP\_COOKIE bliver sendt som POST
- Webservice Password
- Transaktionshistorik på transaktioner der udtrækkes via webservice
- Ved relay bliver accepturl'en sat til direkte at være HTTP (http accepturl)
- Lavet javascript som replacer url'en for betalingsformularen

### **V3.8 2011-03-02**

- Changed from drop down to input fields for expire month / year for the integrated payment form.

### **V3.7 2011-02-17**

- Can now use the relay-script for PrestaShop 1.4.x.
- The payment page is setup with Smarty 3.
- Can now use eDankort for payments using the relay-script.

### **V.3.6 2011-01-28**

- Added support for PrestaShop 1.4 (notice for the Payment Window Only!)
- Added support for Google page tracking in the Payment Window.

### V.3.5 2010-12-03

- Select/deselect logo's to show on relay-page.
- Enhanced settings interface.
- Group relevant settings.
- Added card logos.
- Prepared for Prestashop 1.4.
- Added missing alt= in html img-tags.
- Show card type on Order page in BO.
- Corrected error in the admin setting for parameter Add fee to shipping.
- Added own receipt.
- Corrected error when capturing more than authorized from the backend.
- Corrected so split payments can be captured more than once.

## Requirements

You must have the following:

- Most recent PrestaShop based system.
- ePay Payment Gateway merchant number / login (get it here: [www.epay.dk](http://www.epay.dk)). Read more about this below in next section.

## Copyright

Copyright (c) 2010. All rights reserved ePay - [www.epay.dk](http://www.epay.dk).

This program is free software. You are allowed to use the software but NOT allowed to modify the software.

It is also not legal to do any changes to the software and distribute it in your own name / brand.

## Before you begin

It is very important that you have an account at ePay. In order to get a 100% free demo account for testing purpose please contact ePay:
